### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The problems addressed by the instant method is to provide a process for purifying acrolein in a simple, inexpensive and safer way while minimizing the fouling deposits in the distillation column used (page 2, lines 35-38); to respond to the safety problem related to the storage of liquid acrolein; and to avoid losses in yield by stripping of the MTPA and the expensive treatment of the gaseous effluent of the prior art, (page 5, lines 21-26).

This problem is solved according to the invention by carrying-out the process according to the claimed invention for the purification of acrolein and to manufacture of MTPA by reacting the gaseous acrolein thus purified, devoid of noncondensable gases, directly with liquid or gaseous methyl mercaptan. See page 5, lines 26-37.

None of the documents cited in the search report would have suggested to a person skilled in the art, inter alia, the separation of the incondensable gases prior to the reaction between the acrolein and the methyl mercaptan, nor describes the method for producing 3-(methylthio) propionaldehyde (MTPA) as claimed.

Thus, the subject matter of claims 1-8, and 10-18 is neither disclosed by the prior art nor is obvious. The claims are deemed allowable over the prior of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 571-272-1450.
